

## **Euro-IX remote IXP member category**

### **1. Introduction:**

There are certain IXPs based outside of the Euro-IX European region that have an interest in participating in the Euro-IX IXP community however due to either their geographical location, their financial situations or human resource limitations, they are highly unlikely to be in a position to send representatives to the Euro-IX Forums on a regular basis. However they would like to take advantage of Euro-IX affiliation and would like to participate on Euro-IX mailing lists as well as having access to the restricted web pages and thus giving them the ability to view forum presentations, session video recordings and gain access to Euro-IX information repositories such as the Switch and Route Server databases.

At the 88th EBM in Prague, the Euro-IX board agreed to help such IXPs in their desire to participate in the Euro-IX IXP community. In particular, Euro-IX would grant qualifying IXPs certain membership benefits at a reduced annual fee.
